To Our Valued Medicare Patient:

Thank you for scheduling your Medicare Annual Wellness Visit. You may know already that Medicare has developed a new health care visit for its beneficiaries called an “Annual Wellness Visit”. This service is paid by Medicare at 100% of the allowable, meaning there are no deductible or coinsurance fees; therefore, free for you. It is important to know, however, that there may be fees associated with studies ordered during this visit. The goal of this visit is to provide time for you to focus on areas of your health that put you at risk for problems in the future. As part of the visit, you will be screened for fall risk, safety risk, worsening memory, depression and other medical concerns. This visit does not include a thorough physical exam or discussion of your chronic health problems. If you desire a “head to toe routine” physical examination or discussion of your chronic illnesses during the same visit, **please arrange for additional time to be scheduled with our appointment scheduler.** There will be additional charges for these services. Medicare still does not cover a complete routine physical exam. Therefore, you will be responsible for this additional cost.

In order to help the Annual Wellness Visit to run smoothly, **please bring all your medicine bottles and completed enclosed forms.** If you arrive at the clinic without these forms, your visit will need to be rescheduled as it takes our staff and providers extra time to document your answers in our records. When you arrive at the office, please inform the front desk staff that you are scheduled for your Medicare Annual Wellness Visit and present them with your completed forms.

We look forward to seeing you in our office and we thank you for your confidence in allowing our practice to handle your healthcare needs.

Sincerely,

Potomac Family Practice
